Please read this brief description:

Vaping is the act of inhaling and exhaling a vapour produced by a vaping product, such as an electronic cigarette. This vapour is often flavoured and can contain nicotine.

The level of nicotine in the vaping substances can vary widely. Some mixtures contain low levels of nicotine – or none at all – while others can contain more nicotine than cigarettes.

QV2. Based on this definition, have you or anyone else you know ever vaped?

[Multi-choice]
Yes, I have vaped
Yes, someone else in my household
Yes, a friend or family member who does not live with me
[exclusive] No, no one I know vapes

QV3. Recently, the federal government passed a new law regarding vaping. Please tell us whether you support or oppose the following elements of the law:

[Rows – Randomize?]
Ban the sale of vaping products to Canadians under the age of 18
Restrict promotion and marketing of vaping products in Canada
Ban fruit, bubble gum and other flavours of vaping products that may appeal to young people
Enable government to make rules for packaging/labels
QV4. Proponents say that vaping is much safer than smoking real cigarettes and is helpful to smokers who are trying to quit, while detractors argue that vaping is re-introducing or normalizing a bad habit, and could be a gateway to cigarettes for young people.

In your opinion would you that vaping does:

More harm than good
About equal amounts of harm and good
More good than harm
Really can’t say

QV5. Do you agree or disagree with the following statements?

[ROWS – RANDOMIZE]
It bothers me when people smoke around me
It bothers me when people vape around me
It bothers me when people drink alcohol around me
People should not vape indoors
Switching from smoking to vaping is a good move for your health

[COLUNMS]
