ARI Questionnaire

QA5. As you might know, the proposed TransMountain pipeline expansion project would twin an existing pipeline to increase the amount of oil moving from Alberta to the B.C. coast for shipment to markets overseas. This would mean an increase in the number of oil tankers in the Burrard inlet from 5 per month to about 35. The Alberta government strongly supports this project while the B.C. government opposes it. The federal government bought the pipeline last year and has approved it for construction.

Would you say you support or oppose the TransMountain pipeline expansion project?

- Strongly support
- Moderately support
- Moderately oppose
- Strongly oppose
- Not Sure/Can't say

QA6. Last week, it was announced the cost of completing this project has increased from about \$7.4 billion to \$12.6 billion. As mentioned, the project is owned by the federal government and will be paid for by Canadian taxpayers. The federal government says the project remains commercially viable.

Given this new cost estimate, would you say you support or oppose the TransMountain pipeline expansion?

- Strongly support
- Moderately support
- Moderately oppose
- Strongly oppose
- Not Sure/Can't say
