Regional sample sizes are unweighted. All other sample sizes, including column totals, are weighted to census data. Cells containing ""%"" are statistically zero, though at least one response was received. Blank cells indicate zero responses received. Sample sizes below 100 should be interpreted with caution.

Q9. And now, looking to the future, when the pandemic is passed and there are no more restrictions on activities, what are you most excited to do when that time comes?

Q10. Finally, how long do you think it will be before life in Canada goes back to "normal" – that is – the way it was before the pandemic?
