

**[Previous questions withheld for future release]****[text]**

On a different topic now, the COVID-19 vaccine rollout in Canada.

**[T]QV1.****Base=All****Single choice**

When a vaccine against the coronavirus became available to you, would you get vaccinated, or not?

Yes, I would get a vaccination as soon as one became available to me

Yes, I would eventually get a vaccination, but would wait a while first

No, I would not get a coronavirus vaccination

Not sure

**[T] QV2.****Base=all****Single choice**

Based on what you have read, seen, or heard, what is your assessment of the Canadian government's efforts to secure doses of COVID-19 vaccine?

Canada has done a good job in securing sufficient doses for Canadians

Canada has done a poor job in securing sufficient doses for Canadians

Not really sure/Can't say

**[T]QV3.****Base=all****Single choice**

And how confident are you in the federal government to effectively manage the distribution of vaccines to the provinces/territories in Canada?

Very confident

Confident

Not confident

Not confident at all

Not really sure/Can't say

**[T]QV4.****Base= all****Single choice**

Closer to home, how confident are you in your provincial government to effectively manage the distribution of vaccines within your province?

Very confident  
 Confident  
 Not that confident  
 Not confident at all  
 Not really sure/Can't say

**QV5.****Base=see row options****Single choice grid**

Prime Minister Justin Trudeau says everyone in Canada who wants a vaccine will get one by September 2021. How much confidence do you have that:

**[rows]**

**[Base= Exclude will not get vaccinated in QV1]** You, personally will have the chance to be vaccinated by September 2021

**[Base=all]** Everyone in Canada who wants a vaccine will have one by September 2021

**[columns]**

Very confident  
 Confident  
 Not that confident  
 Not at all confident  
 Not sure/Can't say

**QV6.****Base= Not that / Not at all confident / Not sure for item 2 in in QV5****Single choice**

If not by September, when do you feel everyone in Canada who wants to get a vaccination will have received it?

By the end of the year  
 By next spring  
 By next summer  
 Longer than that

**QV7.****Base=All****Single choice**

Canada isn't the only country vaccinating its populations. As of February 8<sup>th</sup>, the UK has administered 18 doses per 100 people, while the US rate is 11 doses per 100, Canada has given 2.8 per 100, about the same as France (3.1) and the Netherlands (2.4).

Some people say Canada's numbers represent a failure in its vaccination efforts and this country should be doing as well or better than other nations. Other people say Canada's rate of vaccine distribution does not represent a failure, and the process is largely out of our control.

Based on what you've seen, read, or heard, how would you assess Canada's vaccination efforts compared to other countries? Which of the following is *closest to how you feel* about these efforts?

Would you say this is...?

A failure – Canada should be doing better than other countries

Not a failure – This process is largely out of Canada's control
