

Now some questions on a different topic – energy.

**QE1.**

**Base = all**

Thinking about energy policy in Canada – that is the rules and practices around generating energy to fuel our households, businesses, and communities, how would you rank the following priorities from most important to least important?

**[Randomize]**

Economic growth

Stability of supply

Not depending on other countries for energy supply

Renewable energy

Protecting the environment

**QE2.**

**Base = all**

Right now, which one of the following do you think should be the more important priority for addressing Canada's energy supply?

**[RANDOMIZE OPTIONS]**

Investing in alternative sources, such as wind, solar and hydrogen technology

Investing in exploration and production of oil, coal, and natural gas

Both should be given equal priority

**QE3.** The following are different sources from which Canada can draw energy. Please tell us whether you support or oppose EXPANDING efforts to draw energy from each of the following sources:

**[randomize]**

Oil and gas operations (crude oil)

Nuclear power generation

Coal mining

Solar panel farms

Hydraulic fracturing, sometimes called "fracking," for oil and natural gas

Wind turbine farms
