

**Federal Election Poll #8**

**Sept. 2-6, 2021**

**Some questions held for future release. Other questions have already been released.**

**QB1.**

**Base=All**

**Single choice**

Have you had, or will you receive a vaccine against COVID-19?

Yes, I have already received one vaccination shot

Yes, I have been fully vaccinated – no more shots required

Yes, I will eventually get a vaccination but am waiting

No, I will not get a coronavirus vaccination

Not sure

**QB2.**

**Base=Vaccinated**

**Single choice**

Some Canadians are reluctant to be vaccinated. In some provinces, public health officials are trying change their minds with incentives such as gifts, free meals, or lotteries.

Some people say this approach of incentivizing people to be vaccinated is the right way to go. Others say it's the wrong approach and public health officials should instead introduce tough rules that prevent people who aren't vaccinated from being able to attend public events, travel, go out to dinner, etc.

How do you think **your own** provincial government should approach this?

[ROTATE FIRST 2]

Use incentives – lotteries, prizes etc., to encourage people to get vaccinated

Use regulations – making vaccines mandatory in public places to make life harder for unvaccinated people

Both

Neither

**QB3.**

**Base=All**

**Single choice grid**

There's been some discussion recently about whether people in Canada should have to show proof they have received at least one dose of a COVID-19 vaccine to attend or participate in different activities in their communities. These discussions usually refer to "vaccine certificates" or "vaccine passports". They're just referring to proof of vaccination.

For each of the following scenarios or places, do you agree or disagree that proof of vaccination should

be mandatory?

At your place of work

In-person dining at a restaurant

At public places in your community i.e. malls, movie theatres, churches etc.

To attend a public event or large gathering (concerts, events with more than 50 people)

To board a commercial airline flight

To travel to the US

To travel internationally (excluding the US)

Strongly agree

Agree

Disagree

Strongly Disagree

Not sure/Can't say

**QB4.**

**Base=Vaccinated**

**Single choice**

In many communities in Canada, there are rules in place that require people show proof of vaccination in order to enter certain places or participate in activities, or these rules will be implemented soon.

Suppose there were places in your community where proof of vaccination is required. For this example, let's assume it is a restaurant. Now let's say there's a person who refuses to follow the rules and show proof of vaccination, and also refuses to leave the premises.

What would you like to see done in this case?

The person is escorted off the property but no additional punishment

The person is fined for their actions

The person is arrested and charged

Other: specify\_\_\_\_\_

**QB5.**

**Base=Vaccinated**

**Single choice**

Some say that people who refuse to be vaccinated against COVID-19 are ignoring public health advice and putting themselves at greater risk, and if those people get sick with the coronavirus, they should not have the same access to medical care as people who have been vaccinated.

Other people say regardless of whether someone refuses to be vaccinated against COVID-19, if they get sick, they should have the same access to medical care as those who chose to take their shot.

Which view is closest to your own?

[rotate]

All Canadians should receive the same priority of treatment, regardless of their vaccination decision

People who choose not to be vaccinated should get lower priority for medical treatment if they're sick with COVID-19
