Today we have some questions about the COVID-19 pandemic. As always, your answers are completely anonymous and only looked at in aggregate with all other responses. Please be as honest as possible to help us understand this issue better.

**QC1.**
*Base=All*
*Multichoice*

Since December 1, have you had any of the following symptoms? Please select all that apply, regardless of when you may have had them in the past two months:

- Sore throat
- Sneezing
- Runny nose
- Fever/Chills
- Dry cough
- Headache/body ache
- Shortness of breath or difficulty breathing
- Loss of smell
- Fatigue
- Night sweats
- [Exclusive] No symptoms

**QC2.**
*Base=All*
*Single choice*

Have you been tested for COVID-19 during this wave of the Omicron variant – since December 1?

- Yes, tested positive
- Yes, tested negative
- No, wanted to but haven’t been able to get tested
- No, have not been tested, haven’t tried

**QC3.**
*Base=Top Two in QC2*
*Single choice grid*

How many of each of the following tests have you taken since December 1?

- At a testing center
- At home (self-test)

- 0
- 1
- 2
- 3+
You mentioned that you have received a positive result during this period, when did you receive this test result? Your best estimate is fine:

- In the last two weeks
- First two weeks of January
- In December

And how would you describe your symptoms from COVID-19?

- Relatively mild – just minor symptoms
- Serious but manageable - like a case of the flu
- Very severe – required hospitalization

You mentioned that you have not had a positive test for COVID-19 over the past since December first, that said, based on your best guess, do you believe that you have had COVID during that time?

- Yes, almost certain
- Yes, probably
- Probably not
- Almost certainly not

OK, and how would you describe your symptoms – the ones that you believe are likely associated with COVID-19?

- Relatively mild – just minor symptoms
- Serious but manageable - like a case of the flu
- Very severe – I thought about going to the hospital
Including yourself, how many adults (18+) if any, in your household have tested positive for COVID-19 since December 1?

0
1
2
3+

QC9.
Base=All
Single choice

And how many children (17 or younger) in your household have tested positive for COVID-19 since December 1?

0
1
2
3+

(How bad would it be?)

QC10.
Base=Probably Not/Almost certainly Not in QC6
Single choice

Suppose you did get sick from COVID-19. How serious do you feel this would be for you, personally?

Relatively mild – just minor symptoms
Serious but manageable - like a case of the flu
Very severe - worry I may have to be hospitalized
Possibly deadly – I am very vulnerable

QC11.
Base=All
Single choice grid

Thinking specifically about the Omicron variant COVID-19, do you agree or disagree with the following statements:

I will be exposed to and infected with Omicron no matter what I do
2022 will be the last year of the pandemic
Canada should shift its efforts to focus on vaccinating people in less wealthy countries
It’s time to end restrictions and let people self-isolate if they’re at risk

Strongly agree
