Regional sample sizes are unweighted. All other sample sizes, including column totals, are weighted to census data. Cells containing "*%" are statistically zero, though at least one response was received. Blank cells indicate zero responses received. Sample sizes below 100 should be interpreted with caution. Because its small population pretudes drowing discrete samples over multiple waves, data on Prince Edward Island is not released.

QP1. Do you approve or disapprove of the performance of [Premier and leader of...]?
