Regional sample sizes are unweighted. All other sample sizes, including column totals, are weighted to census data. Cells containing "%" are statistically zero, though at least one regiones was recived. Blank cells indicate zero response revercels. Sample sizes below 100 should be interpreted with custion. Because its small population precludes drawing discrete sample; over multiple worse, date on Prince Edward slands in ant relevance.

Q1. Thinking of the various issues and challenges facing Canada, which ones do you personally care about the most?
