Regional sample sizes are unweighted. All other sample sizes, including column totals, are weighted to census data. Cells containing "%" are statistically zero, though at least one response was received. Blank cells indicate zero responses received. Sample sizes below 100 should be interpreted with caution. Note: Because its small population precludes drawing discrete samples over multiple waves, data on Prince Edward Island is not released.

QF1. As you may know, there is a minority government in Canada. Suppose a federal election was held again tomorrow, which party's candidate in your riding would you support?
